THE WEEKLY CROP BULLETIN.

Slight Improvement in Conditions in Most of the Counties.

The following is the Weekly Crop Bulletin of the Virginia Weather Bureau:

A summary of reports of the correspondents for the past week shows a slight improvement in crop conditions in most all counties of the State. A few localities report no progress, owing to unfavorable weather (cold and dry), but on the whole, all crops, except corn, peanuts, clover, and hay, are advancing satisfactorily. Winter wheat is being harvested in many of the Tidewater and Middle counties, and will be general next week, except in the Valley section. The prospects are very favorable for an unusually good crop. Winter and spring oats are making fair progress, though the former is reported as heading low. Both Virginia and Spanish peanuts are a poor stand. Corn is in a very satisfactory condition all over the State, and all indications point to a short crop. A large acreage has been planted, some of which is coming up fairly well, and some died. This crop, so far, appears to have done best in Norfolk county, where sowing has begun, but is irregular and the stalks, though short, are of a good color. The harvest of clover and grass continues with crop short. Cotton has improved some, and has been cleaned. Tobacco is promising in most sections, especially the dark variety. Recent rains have enabled the planting of the last of the crop to be done, and it is now about all in. Some damage has been caused by buds, cut, and wire-worms. Barley is ripening in the Valley section. The prospect for apples has fallen off some.
